This document comes from the Ada-Shaw HPLC laboratory. This is a sample queue for analysis of low molecular weight acids (acetate, formate, propionate, butyrate).

Subject: Mystery Document

Rick,

We are trying to find out who the owner in EPA would be for this document so we can properly categorize it in the Pavillion FOIA response. I appreciate your help with this.

Bill Batschelet from the Golden Lab found parts of this document on the web at these sites, if this helps at all.
